MEMORANDUM FOR: Mr. Houston
SUBJECT : Material on Separation Actions

The attached folder contains material assembled from our Office files and is fairly complete in tracing the history of all regulations for separation actions under the Director's special authority and under E.O. 10450. I have not for one reason or another gotten to the point of drawing up a suggested procedure for the HRB as you had requested me to do. I am inclined to think that on the whole the draft drawn up (I believe) by [redacted] is a pretty good guide. I have understood, however, at various times in the past that the major problem has been not in finding a suitable procedure but in securing acquiescence in the command line that such procedures should be published in the regulations and become a standard. At any rate if you wish to proceed further with this I suggest that whoever works on it start with this material, which took some considerable time in the assembling.
